ASI starts work on new budget task force

Questionnaire will allow students to give input on areas to be cut

By Brad Hamilton
Senior Staff Writer

ASI will be helping students cross the bumpy budget road by creating a budget task force.

And the instrument the task force will use to help them will be a questionnaire asking students where the budget cuts should hit, ASI President Kristin Burnett said.

In an interview Wednesday, Burnett said the task force is in the preliminary stages. She said

students will probably be able to pick up questionnaires in general education classes, at tables spread around the campus or through clubs and organizations.

She said 2,000 questionnaires are being printed and could be available to students as early as next week.

The task force is being created to involve students in the ongoing budget process.

"Last year the students did not know what was happening," said Nicole Brown, vice chair of

the task force.

The task force has three jobs to do to get budget cut decisions to the students, Brown said.

First, she said the task force will research the budget. After research, the broad-based student group will work on an "instrument" — the questionnaire — to collect data prioritizing the areas where the students want the budget cuts. The third part of the task force's mission is to inform students where they can focus their program saving energies.

Brown said an example of the type of questions students will find on the questionnaire would be if students wanted the library

open more hours.

"We're not saying (the results) will impact administration, but at least students will know they had a voice," Burnett said. "And we are not going to be like the Academic Senate saying we thought of the students when we made the decision."

In the best-case scenario, the results will be compiled into a readable document and given to the Academic Senate and Robert Koob, vice president of Academic Affairs, Brown said.

Burnett said in the best-case scenario, the document will im-

Officials: Bomb threats will not be taken lightly

By Laura Bloner
Staff Writer

What kind of person would call in a bomb threat?

Campus authorities and local psychologists are hard-pressed to describe a common psychological profile.

Philip Bailey, dean of the College of Science and Mathematics, said he feels that callers are trying to "exert inappropriate control."

"Bomb threats are a form of terrorism, just like harassment, murder, or rape," Bailey said.

Bomb threats at Cal Poly are on the rise. Two were phoned in last Monday, the second and third threats called in to campus officials this calendar year. Last year, 18 such threats were reported.

"It's a terrible assault on a person's educational opportunities," Bailey said. "(It's) a terrible assault on a person's morale when you study hard for an exam and have to take it somewhere else."

Dr. Judith Kaliski, a local forensic psychologist, agrees with Bailey on how bomb threats affect society.

"Different people do this for different reasons, but it's always an anti-social act," Kaliski said.

Jim Aiken, a psychologist at Cal Poly,

said he believes there are two main reasons bomb threats are made: to play an immature prank or to avoid academic responsibility.

Not surprisingly, most calls are made in buildings that have an exam at the time of the call.

Bomb threats became so numerous last quarter that the College of Science and Mathematics began a university-wide bomb threat task force committee. Members discuss how to handle threats and deal with perpetrators.

The College ran an ad in Mustang Daily, offering a \$1,000 reward for information leading to the arrest and conviction of a caller. The reward still stands.

Very few students have missed an exam or a class because of a bomb threat, as alternate locations are usually provided for each class.

No bombs were found last year, and the calls resulted in only one arrest. But the problem is not being taken lightly.

"Anytime this department receives a report of a possible bomb being planted in a building, we consider it very serious, and we hope everyone else does too," said Public Safety Detective Ray Berrett. "It puts us all in a hazardous position."

Mother hopes lifting gay military ban will save lives

CHICAGO (AP) — When Dorothy Hajdys last talked with her 22-year-old sailor son, he promised he would be home soon. The next time she saw him, he was in a coffin — beaten to death.

Seaman Allen Schindler was killed in Japan, a month after he told the Navy he was gay. His mother hopes President Clinton's plan to lift the military ban on homosexuals will shield others from tragedy.

"It's too late for Allen," said Mrs. Hajdys. "But maybe this will save someone else's life."

Schindler's death last October has become a rallying point for activists, who contend it was a

classic case of gay bashing. They've held a memorial service in San Diego, where the seaman lived before his ship traveled to Japan, and a candlelight vigil in Washington.

In Japan, the Navy recently held the military equivalent of a grand jury hearing to determine whether Airman Apprentice Terry M. Helvey, 21, of Westland, Mich., will stand trial for murder.

Another seaman, Airman Apprentice Charles A. Vins, 20, pleaded guilty at a November court-martial to lesser charges of concealing a crime and resisting arrest. He agreed to testify against Helvey under a pretrial

agreement.

Mrs. Hajdys, who divorced Schindler's father when the boy was 4, later remarried and is now widowed, said she had to learn many details of her son's death from the military newspaper Stars and Stripes.

"I keep asking the Navy for the motive," she said. "They keep telling me they don't know yet."

Schindler's body was found Oct. 27 in a public restroom in Sasebo, Japan, the home base of his ship, USS Belleau Wood.

When Mrs. Hajdys saw her mutilated son in the funeral home, she didn't recognize him.

"His nose was even with his lips," she said. "His head was caved in. His eyes were back by his ears. All but two of his ribs were broken. ... There were two lacerations on his penis."

Her daughter asked the funeral home to undo his sleeves and he was identified by two tattoos — a tiger and an emblem of the USS Midway, the ship he served on and loved before transferring to the Belleau Wood in 1991.

Schindler was miserable on the amphibious assault ship.

"He told me he didn't have to worry about dying and going to

into the first crucial decisions of the
Clinton administration.

hell, he was already there," his mother said. Friends, his mother said, reported her son was harassed, punched and called a fag. Others told her another gay man on the ship was assaulted.

Navy officials say they have no record of Schindler complaining about harassment.

Bradley signals opening of first modern L.A. subway

Los Angeles, Calif.

Mayor Tom Bradley blew a whistle and said "All aboard" Saturday at a ceremony officially opening the Metro Red Line, the city's first modern subway.

"This day is here," Bradley, an ardent subway supporter, told about 300 people gathered in a downtown station beneath Pershing Square. "We have our first Metro Line system that will take us into the 21st Century."

Bradley and a host of politicians, including Gov. Pete Wilson, arrived in the station aboard the whisper-quiet, stainless steel train cars that run along the 4.4-mile leg of the rail system.

Their appearance was preceded by a dramatic light show. The lights in the underground station were dimmed so spectators could see neon modern artworks glow on the ceiling.

The first segment of the Red Line, which took six years and \$1.45 billion to build, opened to passengers at

Transit officials call the subway the backbone of a Southern California rail system that, when completed by 2010, will carry an estimated 500,000 passengers a day on 400 miles of track.

1 p.m. Saturday. The line connects the downtown Union Station with MacArthur Park in the Wilshire District.

Rides on the subway were free Saturday and Sunday. Fares during the first month of operation will be 25 cents. After that, passengers will buy \$1.10 tickets from ATM-like machines and ride on the honor system. There will be no turnstiles.

The Red Line is part of an ambitious, \$5.3 billion effort to wean Southern Californians off their cars and get them to use public transportation.

Transit officials call the subway the backbone of a

Southern California rail system that when completed by 2010 will carry an estimated 500,000 passengers a day on 400 miles of track.

Two above-ground lines are already in operation. The Blue Line, running 22 miles from Long Beach to Los Angeles, opened in 1990. Metrolink, which connects Los Angeles with three outlying suburbs, was christened last October.

Saturday's festivities were slightly marred by a collision involving a Blue Line car and a passenger car just before noon in Long Beach. The car apparently turned into the path of the train, said Rapid Transit District spokesman Bill Heard.

No one in the passenger car was injured.

However, most of the attention Saturday was focused on the quiet, sleek, underground Red Line cars, a marked contrast to those that operated on the city's last major public transportation system, the Pacific Electric Railway "Red Cars."

NEWS BRIEFS

Desert quake is world's biggest

Los Angeles, Calif.

The major earthquake that rocked Southern California last summer was stronger than previously estimated, a magnitude-7.6 jolt that was the world's most powerful quake in 1992.

The world was shaken by 70 significant earthquakes that killed about 3,500 people during the past year, the U.S. Geological Survey said Friday in its annual report on global seismicity.

While that is a slight increase over 1991's quake fatalities, it is still well below the long-term average of about 10,000 deaths annually, said the report from the agency's western regional office in Menlo Park, Calif.

Ten of the 70 significant quakes were centered in California.

Southern California's Landers earthquake ripped through the Mojave Desert, killing one child.

The June 28 quake and its Big Bear aftershock three hours later injured more than 400.

The USGS initially estimated the Landers and Big

Honig convicted on four counts

Sacramento, Calif.

The state's top public school official was convicted on charges of steering lucrative public contracts to an education foundation headed by his wife.

Superintendent Bill Honig, who had acquired a national reputation as a reformer during his decade in the office, was found guilty Friday of four conflict-of-interest charges.

Honig, 55, faces up five years in prison. He was suspended from duties and will be removed from his elected post when he is sentenced Feb. 26.

Honig said he wouldn't resign before then. "I still don't think that there was anything that warranted this case," he said after the verdict.

Bear quakes as measuring 7.4 and 6.5 in magnitude, later upgrading them to 7.5 and 6.6.

In its new report, the agency said the quakes actually measured 7.6 and 6.7.

Wrestler Andre the Giant dies

Paris, France

Wrestler and actor Andre Rene Roussimoff, known in the ring as Andre the Giant, died of an apparent heart attack while visiting France to attend his father's funeral. He was 46.

The 7-foot-4, 520-pound wrestler, a native of France, lived on a ranch in Ellerbe, N.C. His body was to be cremated in France and the ashes brought to North Carolina.

Roussimoff had visited his family on Wednesday, then returned to his hotel room where he died, said longtime friend Frenchie Bernard.

"He was lying in his bed when they found him," Bernard said. "He just went to sleep and never woke up."

Roussimoff also was an actor, best known for his role as the gentle giant Fezzik in the film "The Princess Bride" in 1987.

Roussimoff, who was a WWF wrestler, was a former resident of Canada and had owned a restaurant in Montreal.

Clinton's disapproval rating soars early in term

WASHINGTON (AP) — The Clinton administration, burdened with the highest disapproval ratings of any new president in decades, is struggling to regain control of its message after an unexpected honeymoon detour.

President Clinton spent most of last week distracted from his economic agenda — the centerpiece of his campaign — by unrelated issues such as homosexuals in the military and finding a new attorney general.

Clinton must set his own agenda, or find his new presidency buffeted week after week by the concerns of others.

"I think Clinton has hit the

ground stumbling," said Ben Wattenberg, a senior fellow at the American Enterprise Institute. "The great whirlwind of activity that was supposed to happen has not occurred."

"The economy is what he was elected on and that's what people are waiting for," said Jeff Faux, director of the Economic Policy Institute, a labor union-based think tank.

Clinton insists his "laser beam" economic focus hasn't been diverted by side issues.

"It's distracting you. It's not distracting me," he snapped at reporters last week amid negotiations over lifting the gay ban.

But Democrats and Republicans alike say the opening days of Clinton's administration have lacked the same discipline and focus as his well-oiled

"Putting People First" presidential campaign.

Democratic consultant Ann Lewis said some confusion is inevitable in the early days of a new administration.

"The same week you're chang-

ing all the phones at the White House, it's tough to stay on top of a multimedia presentation of message," she said. "I would guess Clinton's long-term commitment to issues of economic change will enable him to weather and outlast this storm."

Senate Minority Leader Bob Dole, R-Kan., said while Clinton's hit some bumps in the road, "no real damage" has been done yet.

"I think the honeymoon was between the election and the inaugural," he said Sunday on NBC-TV's "Meet the Press."

Already distancing himself from campaign promises for a middle-class tax cut and halving the deficit in four years, Clinton has promised to outline his economic plan in a Feb. 17 speech to Congress.

"Everyone looks forward to moving ahead on the things he thinks are important," said Press Secretary Dee Dee Myers. "I think people want a debate about how to get the economy moving again."

But it is Clinton's uncertainty over just how to do that that helped trip him up in the opening days of his presidency, according to Michael Robinson, a professor of government at Georgetown University.

"He could talk about the economy, the economy, the economy, as a candidate but now he's the president and he doesn't know what to do about it," Robinson said. "The reality of governance ... is muddying up that easy message that he had during the campaign."

Americans are giving record-high disapproval ratings to the new president and displaying growing uncertainty about his economic strategy.

A Newsweek magazine poll released Saturday showed 32 percent of Americans disapproved of the way Clinton is handling the job, while a USA Today-CNN poll released several days earlier gave him a 20 percent disapproval rating. These were the worst approval ratings for any new president since the

**THE
FIRST
100 DAYS**
One in an occasional series of insights into the first crucial decisions of the Clinton administration.

Gallup Organization started such measures in 1953 with the Eisenhower administration.

At the same time, 73 percent of respondents in the USA Today-CNN poll said they didn't know what Clinton would do about the economy, up from 64 percent in a Dec. 20 poll.

Presidential historian Leo Ribuffo, a professor at George Washington University, said Clinton was experiencing "the usual shakedown problems anyone has at the outset" but it was too early to draw long-term conclusions.

"Like everyone else who comes in, particularly (one) who defeats an incumbent, he was much too optimistic about what he could do right away," Ribuffo said.

"He could talk about the economy ... as a candidate but now he's the president and he doesn't know what to do about it."

COMMENTARY

Accepting the contribution

By Bryan Bailey

*"Oh, the white folks
hate the black folks;
and the black folks
hate the white folks.
To hate all but the right folks
is an old established rule."*

— "National Brotherhood
Week"
Tom Lehrer, *That Was The
Year That Was*

Some time ago, a certain segment of society felt that, since the United States of America had served them so well by offering a roof over their heads and three square meals a day, they might try to repay in kind by serving their country.

Unfortunately, when the group of patriots attempted to fulfill this ambition, they discovered that America's beneficence extended only so far.

The U.S. military met them with derision, cruelty, and in many cases, violence and death. To put it in crudely understated terms, they were not accepted. They were faced with the same archaic form of prejudice that society had shed some years earlier, or at least slid under a somewhat more civilized veneer.

It is probably a less-than-subtle irony that during the traditional month of commemoration for the black population of the United States, the homosexual community is repeating its tortured history. And once again, they are being met with the same lagging social consciousness that greeted blacks during the World War II era.

It is often hard to understand the mind of the military; such oxymoronic catch-phrases as "peace through strength" come to the forefront of one's mind as ex-

amples of its convoluted thought process.

The legislation proposed by President Clinton is simply a symbolic housecleaning. There have always been gays in the military and there always will be. The abolition of the ban on gays is not going to result in a mass influx of homosexuals into military service, contrary to the fears of most administration higher-ups.

The biggest problem the military seems to be having with the whole process is the elimination of the now-infamous "sexual preference" question posed to incoming recruits.

It's hard to imagine that the armed forces, with its considerable experience in the area of deception, could be naive enough to think that all the "heterosexual" responses to this question are valid. And yet this seems to be the view of those in charge of leading the opposition to lifting the ban. Its as if there is a certain security in ignorance — if one doesn't know that their co-worker is gay, this ignorance provides a sort of barrier to any supposed consequences which might occur between them.

Even this twisted reasoning is fraught with fallacy. Many military personnel, most vocally those in positions of higher authority, claim gays would let their sexual impulses interfere with day-to-day procedure. Daniel Heimbach, Navy deputy assistant secretary, went so far as to be quoted in last Saturday's *Los Angeles Times* as stating that homosexuals "are notoriously promiscuous," a claim that has been repeatedly bandied about as the basis for other assump-

tions, such as an increase of AIDS in the military.

It may serve Heimbach well to take a closer look at the genders and persuasions of who was involved in the ongoing "Tailhook scandal" if he is going to make blanket statements about who might have a hard time keeping various parts of their anatomy under wraps.

The hardest thing to accept about the military's reluctance to officially recognize a segment of their population is its head-in-the-sand approach to the facts that have been laid out before them.

Numerous examples of countries and organizations which have long practiced a more lenient attitude toward the hiring or conscription of homosexuals are excellent case studies for the military to consider. Canada, which has just recently officially opened their military to homosexuals, Israel and the Netherlands all have shown that problems in any are of operation resulting from combining hetero- and homosexual troops in those countries have amounted to less than nil.

The persecution of gays in the American military, in contrast, has gone on long enough; it's time to recognize their contribution toward the constant defense of this nation and allow them the same freedom to exercise the right of serving it as we do to every other American.

Bryan Bailey is Mustang Daily's Opinion Editor. He is not a homosexual but doesn't really care whether you believe that or not.

LETTERS TO THE EDITOR

Series 'superficial'

I am writing in response to the series of articles in Mustang Daily titled "The Gender Gap," by Anita Kreile. This series was an excellent idea; however, what I read was a superficial collection of cute stories about rude comments made by faculty. Miss Kreile (sic) wrote nothing about female engineering students, the problems we face, or the solutions we have found. Those problems include the uneasiness felt when you are the only woman in a class, the lack of role-models for female engineers, and the stereotypes society has for female engineers.

The Cal Poly Society of Women Engineers is indeed an award winning organization, but Miss Kreile (sic) failed to mention why. SWE gives women in all technical fields invaluable resources, industry contacts, encouragement, friendships, stability and support through various activities and leadership opportunities. SWE and the College of Engineering are working to end stereotypes and encourage young women to consider technical fields. The endless support of Renee Greenwood, Women's Engineering Program Director; Jeanne Aceto, Director of College Relations; and Peter Lee, Dean of Engineering, have helped female engineers at Cal Poly beat the odds.

Jana Lea Musser
Aeronautical Engineering

Pro-life doesn't equal sexism

Contrary to David Polk's Jan. 26 [column], sexism does not go hand in hand with the pro-life position. In fact, the attitude that women are valued for only the sexual pleasure they supply to men (their breasts and real nice smell) seems to be consistent with the pro-choice idea that abortion is necessary for our lifestyle. I'm convinced that most women who have abortions really have no other "choice" when it means losing their job (where they already earn less than a man), losing their family. A true feminist would not encourage these women to have surgery to fit into a man's world. Women will not have equal status until we stop treating pregnancy like a disease. Although it is sometimes not planned or warned, pregnancy is a miraculous, beautiful, and uniquely feminine process.

Angie Barry
Civil Engineering

Sorry, Ponch

In the Jan. 27 commentary on the Opinion page of Mustang Daily, Editor-in-Chief Peter Hartlaub belittled the TV show "CHiP's" for "lying" about the effects of marijuana. I cannot sit idly by and let "CHiP's" be maligned like this! Actually, the show attributed the roller-skater junkie skating through a window to some substance being experimented by the scuzzy rayon-wearing pusher and not to marijuana. Granted, I've only seen this episode about 26 times, but I picked up on this fact, nonetheless. I expect to see a full retraction and a written apology to Ponch and John in the Daily this week!

Your belittling of "CHiP's" doesn't fool me, Peter. I know you dig it. It's funny how some people have guts to admit in circulated print to liking marijuana, an illegal drug, but not many have the guts to admit to liking "CHiP's!"

Erik LaGrange
Business

Time for the truth

"So by my logic, if marijuana were legal and taxed by the state at its present cost, it would be the same as if \$5,380 of income could be generated for head of Iceberg lettuce sold in California. That's \$5,380 of state funds that could aid wicked Pete Wilson's dwindling education coffers."

Let me see if I understand your logic: \$10 times 538 grams equals \$5,380, and at 100 percent tax the state would receive the entire \$5,380. 100 percent tax is a big assumption, but this is also assuming that the price would remain the same even though it is as legal to produce as lettuce. Why you took a commentary that started off with good facts and research, and then ran it into the ground with a major logical screw-up is beyond me, but I just wanted to point it out.

It's time to listen to the truth.

TASK FORCE

From page 1

pact the administration's budget decisions.

Burnett said she came up with the idea for the task force after PACBRA, a consultative committee of students representatives, was unable to give Koob an answer when he asked the students where the budget cuts should hit.

Awakening animosities among students will be the main problem that might arise from the task force's efforts, Burnett said.

"But it is better than pretend-

ing the animosity doesn't exist," she added.

Ecological and systematic biology senior Jan Barber said she doesn't feel she has been fairly represented in budget cut decisions. She doesn't think a task force will change the situation much, she added.

"When (students) don't know about the budget, it's hard for people to listen to you," Barber said.

She also mentioned her top budget cut target, the administration.

BOMB THREATS

From page 1

In his 24 years as a peace officer, Berrett has witnessed one death due to a bomb. "It's not something you are prepared to see...you just can't prepare yourself," he said. "I know I will never forget it."

Berrett has never been injured by a bomb, nor has Sgt. Jim Mulhall, a detective with the San Luis Obispo County Sheriff's Department. Mulhall is one of three members on the San Luis Obispo County Bomb Task Force.

"It's a tragedy that anyone would be so self-serving to call in a threat for their own selfishness," he said.

"I think they're cowards, because they can't stand up and face their own responsibilities. I will use any means I have to arrest and prosecute anyone who makes bomb threats in this county."

If someone is caught making a threat, even if there is no bomb,

a misdemeanor charge may result. The offender could face additional criminal and civil penalties as well.

"As a result of a bomb threat, if anyone is injured or killed in an evacuation process, the caller will be prosecuted for any (subsequent) injury," Mulhall said. Agricultural science senior Gamini Weerasekera learned about the legal repercussions of bomb threats the hard way.

Weerasekera was arrested and convicted of calling in a bomb threat and was ordered to serve two years formal probation, a \$250 fine, 20 days in the County Jail. He must also pay restitution to victims of the crime and serve 50 hours community service.

Bailey has a different outlook about punishment. "I don't want to persecute or crucify the person...I want to make an example out of them."

Mustang Daily salutes Joe Tarica, Rob Lehecky, Liz Weber and Carolyn's mom -- this year's winners in the Mustang Daily Celebrity Super Bowl Classic.

6-foot-2-inch center Mildred Conston laid one in for a four-point lead with a minute left.

Conston led her team with 20 points and 10 rebounds.

The Mustangs were led by Rodness' 22 points and Carey's 13 rebounds. Center Carrie Schmidt, averaging 20 points and 8.8 rebounds per game, was held to 10 points and seven rebounds.

Pomona took 19 shots more than the Mustangs as the Broncos made 26 of 68 from the floor (38 percent) to Cal Poly SLO's 41 percent (20 of 49).

"We tried to work inside a couple times, but we were too anxious," said Mustang guard

Nikki Gannon.

At Dominguez Hills in front of 113, the Mustangs displayed the same anxiety on offense, said Cal Poly coach Jill Orrock.

"It was a variety of little things," Orrock said. "We were not working our shots, and it was not like (the open shots) were unavailable."

The Toros led early, and never relinquished their advantage.

Cal State Dominguez Hills average lead drifted around the six-point margin. The largest lead was 12.

At halftime, the Toros led 34-27.

In the second half, Cal Poly closed within four points early and with 1:50 seconds left in the

game.

"We had chances to take the lead, but we either turned it over or fouled," Orrock said.

Schmidt returned to form and led the Mustangs with 18 points and nine rebounds. Rodness had a big game with 14 points and eight rebounds.

Cal State Dominguez Hills had three scorers in double-digits. Guard Karee Bonde led her team with 20 points. Dionne Vanlandingham pulled in 12 rebounds and added 14 points.

The Mustangs will begin a three-game homestand when they take on Cal State Los Angeles in Mott Gym Thursday at 7:30 p.m.

MEN'S HOOPS

From back page

their first half point total with 12:30 to go and cutting the Bakersfield lead to eight.

That's as close as Cal Poly would come.

The next Mustang point did not come until four and a half minutes later, when Clawson hit a running one-hander in the lane.

By then, the Bakersfield lead was 15, and the Roadrunners turned the stretch drive into a dunkfest.

Reggie Phillips put an exclamation point on the Bakersfield win with a 360-degree, two-handed slam as the horn sounded.

"That's just an excellent basketball team," Mustang point guard Jeff Oliver said. "They're going to be tough to beat."

Bakersfield sunk 20 of 43 field goal attempts (46.5 percent) and was 26 of 35 at the free throw line (74.3 percent).

Cal Poly will look to snap its four-game skid Friday night when it hosts Cal State Los An-

geles at 8:05 p.m. The Mustangs also will face Cal Poly Pomona in Mott Gym on Saturday night.

From the horse's mouth:

Sheridan Silver sat out the game with chronic tendinitis in his left knee. His status is listed as day to day.....Other CCAA results from Saturday: Cal[®] St. Dominguez Hills beat Chapman 92-79, Cal Poly Pomona defeated Cal St. Los Angeles 68-61, Cal St. San Bernardino edged UC Riverside 65-64.....Saturday night's crowd of 2,119 was the second largest of the season.....At halftime, Cal Poly retired the numbers of former Mustang basketball players **Mike LaRoche** (# 40) and **Hank Moroski** (# 32). LaRoche's # 40 will continue to be worn for the rest of the season by Silver rather than have him switch numbers.....Ten year old **Riley King** won \$100 in the Sesloc Halftime Airplane Toss. The pot will be worth \$50 when Cal Poly plays Cal State Los Angeles Friday night at Mott Gym.

THE PLACE TO BE IN

MAKE A DATE WITH YOUR FUTURE.

1993 is the year you can begin a promising career with Allen-Bradley Company, a global leader in the manufacture of industrial control and automation products. We deliver solutions to industry to ensure their competitive edge in a global marketplace. And...because we're backed by the strength of one of the world's most powerful companies - Rockwell International - we can deliver career challenges and rewards few high growth companies can match.

Challenging opportunities are available for graduates with a BS in EE, EET, ME, IE, CE, or MET to join Allen-Bradley. Positions are available nationwide.

Plan to meet our representatives while they're on campus. It could be your most important date in 1993. Contact your placement office to schedule an interview for February 5, or see our Recruiter at the Information Session on February 4. We are an Affirmative Action/Equal Opportunity Employer m/f/d/v. Women and minorities are encouraged to apply.

Poly can't catch No. 1-ranked Roadrunners

Second-half run not enough in 69-53 defeat

By Kevin Bolinger
Staff Writer

It was a scene straight out of Looney Tunes.

The plot was similar and the ending identical. The coyote chases the roadrunner only to get pummeled, turning into a puff of smoke.

The Cal State Bakersfield Roadrunners, undefeated and ranked No. 1 nationally, raced into Mott Gym Saturday night and led the Cal Poly men's team off a cliff, 69-53.

With the California Collegiate Athletic Association loss, Cal Poly is alone in last place with a 1-6 conference record, 7-12 overall.

The Mustangs did play a solid defensive game, holding Bakersfield (7-0, 19-0) to its second lowest point total this season.

But with the Cal Poly offense shooting 38 percent from the floor, including an uncharacteris-

tic 21 percent from three-point range, it isn't going to stop Porky Pig from saying "That's all, folks!"

"As a coach I'm pleased with the performance," Cal Poly head coach Steve Beason said. "The ball just didn't drop."

Baskets were hard to come by, particularly inside, due in great part to the intense defense applied by the Roadrunners.

"I thought it was our best defensive effort of the year," Bakersfield head coach Pat Douglass said. "It's always tough to win here."

The Mustangs were led in scoring by Matt Clawson's 15 points and Bubba Burrage's 12.

Kenny Warren paced the Roadrunners with a game-high 16 points.

Neither Bakersfield nor Cal Poly opened the game with a hot touch, the Mustangs making only one of their first 12 to fall behind 10-2 after the first ten minutes.

Calif. Collegiate Athletic Assn.

Team	Conf.		Overall	
	W	L	W	L
Cal St. Bakersfield	7	0	19	0
UC Riverside	5	2	14	5
Cal St. Los Angeles	4	3	12	5
Cal St. Dom. Hills	4	3	13	5
Cal Poly Pomona	3	4	10	9
Cal St. San Bernardino	2	5	9	9
Chapman	2	5	5	14
Cal Poly SLO	1	6	7	12

Saturday's results:

Cal St. Bakersfield 69, Cal Poly SLO 53
Cal St. Dominguez Hills 92, Chapman 79
Cal Poly Pomona 68, Cal St. LA 61
Cal St. San Bern. 65, UC Riverside 64

Bakersfield led at halftime 29-15, Cal Poly's lowest score at the half this season.

Cal Poly made only 26.2 percent of its shots (6 of 23) in the opening half, including an 0 for 5 clip from three-point land.

However, the Mustangs shot out of the block in a hurry to start the second period, doubling

See MEN'S HOOPS, page 6

Montgomery helps Poly go 4-0

By Chris Rogers
Staff Writer

In a match lasting 2 1/2 hours, Cal Poly tennis player John Montgomery defeated his opponent 6-4, 4-6, 6-3. His victory completed a 6-0 Mustang sweep of UC Santa Cruz Saturday.

"I lost my concentration in the second set," Montgomery said. "I knew I had to keep the pressure on and stay aggressive in the third set, and it worked."

The match was over when singles play was completed as the teams declined to play doubles.

Mark Nielsen was the first to capture a victory for the Mustangs. He won 6-2, 6-1, in a match that seemed over from the start.

Marc Ollivier, who won 6-2, 1-6, 6-2, came back strong after a lapse in the second set, and

Ricardo Reyes won 7-6, 3-0, when his opponent defaulted with a foot injury.

Also winning were, Steve Arnott 2-6, 6-0, 6-3, and Josh Johnston, 6-3, 6-3.

The victory over Santa Cruz capped a successful weekend for the Mustangs, who defeated UC San Diego on Friday.

"I was very pleased with the effort today," coach Chris Eppright said. "We picked up our intensity quite a bit from yesterday's match (versus UC San Diego)."

Against San Diego, Marc Ollivier played No. 1 singles and defeated his opponent handily, 6-3, 6-4. Dave Mullarkey stepped in at the No. six position to win 6-0, 6-3.

Josh Johnston and Steve Arnott also won their singles matches.

In doubles, the Mustangs

swept San Diego.

Arnott and Ollivier won a three-set challenge as did Montgomery and Johnston. Nielsen and Reyes easily won their doubles match.

The weekend victories leave the Mustangs undefeated at 4-0. Cal Poly's next match is at Westmont College on Tuesday at 2 p.m.

Male Mustangs topple Tigers

Cal Poly's men's swim team improved its season record to 8-3 Saturday with a 143-90 win at the University of the Pacific.

Highlighting Cal Poly's performance was Trevor Sanders' national qualifying time in the lead leg of the 200 free relay (50 free in 21.03).

P.J. Madigan won two events (400 individual medley, 200 breast) while Scott Swoboda took first in the 200 free.

The Mustang women fell to 6-4 by suffering a 118-110 loss to Pacific.

Cal Poly's Jenni Fricker won the 200 breast and qualified for

nationals in 2:26.42.

Also doing well for the Mustangs was Stephanie Keller, who won the 200 backstroke.

Fricker and Keller both participated on Cal Poly's winning 400 medley relay team.

Cal Poly next swims at Cal State Bakersfield on Saturday at 1 p.m.

From first to third, Mustangs lose two

By Brad Hamilton
Senior Staff Writer

The basketball took some bad bounces for the Cal Poly's women's team in the last two games it played.

The Mustangs sat in sole possession of first place in the California Collegiate Athletic Association before losing 67-61 to Cal Poly Pomona Thursday and 61-54 to Cal State Dominguez Hills Saturday.

Because of the losses, the Mustangs (3-2 in CCAA, 6-9 overall) fell into a three-way tie for third with Dominguez Hills (3-2, 11-7) and Cal State San Bernardino (3-2, 13-6).

In front of a home crowd of 316, the Mustangs went up against a Pomona team (4-1, 16-2) playing like a cornered and wounded animal.

Pomona's 18-year coach, Darlene May, said her team was fighting to avoid making history. The Broncos, champions of 16 straight conference titles, have never dropped two games in a row and were coming off a defeat to UC Riverside.

"We could easily lose two games this season as good as this conference is, but they didn't want to make it back-to-back," May said.

The Mustangs led for the first three minutes of the game, but after the Broncos streaked for a 19-6 run, Cal Poly SLO never led again.

By halftime, the Broncos led 35-24 via an offense dangerous from everywhere inside the three-point arc.

Eight minutes into the second half, the Broncos enjoyed their biggest lead, 14 points. But not for long.

Cal Poly SLO's guard Christine Rodness buried a trey and ignited an eight-minute rally, which narrowed the Broncos lead to 58-57 with 4:07 left on the ticker.

The teams went basket for basket until 1:03 remained. Mustangs' forward Susanne Carey missed two from the charity stripe that would have tied the score.

The Mustangs were forced to start fouling after Pomona's

See WOMEN'S HOOPS, page 6

Women net 6-3 victory

By Craig Stout
Staff Writer

Two clutch wins by its Nos. 3 and 4 singles players helped Cal Poly pull out a 6-3 win over Westmont in a non-conference women's tennis match Thursday.

Sheri Holmes, who plays in the No. 3 slot for the Mustangs, overcame a 1-4 deficit in the third set before winning 7-5. She won the first set 6-3, but lost 1-6 in the second.

At the No. 4 position, Michelle Berkowitz battled for over three hours to beat Westmont's Julie Elliott 6-3, 3-6, 7-5.

"Holmes' comeback and Berkowitz's 3 1/2 hour win were the difference," said Cal Poly coach Chris Eppright.

Julie Ciancio, Allison Light and Emily Schuch all posted straight set wins in singles for the Mustangs (3-0 overall).

Cal Poly's lone win in doubles came from its No. 3 team of Holmes and Alissa Bailey, a 6-4, 7-5 victory.

Cal Poly hosts San Jose State on Saturday.
